**0-1800° READY-TO-GRILL IN 30 SECONDS**

**HOW TO COOK THE PERFECT INFRARED STEAK**

1. Lift lid of grill or side burner.
2. Ignite infrared burner.
3. Warm up for one minute.
4. Place thick, juicy steak on grids.
5. Wait two - three minutes, flip steak with tongs. (You do not want to use a fork and pierce the steak as this will let out the juices the infrared has locked in.)
6. Wait another two - three minutes, turn off the knob.
7. You now have a medium rare steak.
8. Bon Appetite.

**TIP:** Pick a steak that is well marbled, the more marbled there is inside, the more flavorful and tender your steak will be. A perfect steak size is about 1 1/2 to 2 inches thick and about 12 to 16 ounces each, depending on the cut.

**AIR CONDITIONERS • DEHUMIDIFIERS**
